

## EDUCATION

### Florida International University

Aug. 2023 – Dec. 2026

Bachelor's in Computer Science

Miami, FL

- **Relevant coursework:** Data Structures, Algorithm Techniques, Systems Programming, Software Engineering

## TECHNICAL SKILLS

- **Languages:** JavaScript, C/C++, C#, Python3, Typescript, SQL, SQLite
- **Libraries/Frameworks:** Node.js, React, React Native, Tailwind, .Net, Pandas, FastAPI, PyTorch, Transformers, Huggingface, Tailwind, Nativewind, Unity
- **Tools:** Git, Azure DevOps, Postman, DigitalOcean

## EXPERIENCE

### FEAM Aero

Sep. 2025 – Present

Software Engineering Intern

Miami Lakes, FL

- Collaborated within a team of **5** engineers to deliver **15–20** tickets across **full-stack** features and bug fixes for a legacy (**C#, React, TypeScript**) and modern (**React, Tailwind, Python**) codebase serving **1,500+** mechanics, managed via **Azure DevOps**.
- Modernized and refactored legacy software features, improving application performance by **10–20%** and enhancing long-term maintainability across a large-scale management platform.
- Built and maintained **REST API** integrations using **Microsoft SQL Server** to fetch and manage operational data including mechanic work hours, fuel usage, and aircraft service records.

### UKG

Sep. 2024 – Dec. 2024

Software Engineering Intern

Weston, FL

- Contributed to a **Microsoft Dynamics 365** financial webapp serving **80,000+** clients by resolving backend tickets via **Azure DevOps**, utilizing **C#, Microsoft SQL Server**, and internal **REST APIs** to fix bugs, improve automation, and enhance overall performance.
- Independently designed and developed a **full-stack** internal email automation tool using **X++**, enabling team members to assign automated actions to emails and receive real-time pass/fail notifications, reducing manual workload for the team.
- Improved overall engineering team efficiency by **10%** through backend optimizations and delivering tooling that streamlined repetitive financial workflows within **Microsoft Dynamics 365**.

### Mercedes-Benz

Aug. 2023 – Sep. 2024

Systems/Network Analyst

Coral Gables, FL

- Resolved **25+** tickets per week for **250+** clients alongside a sole IT Administrator, maintaining and configuring **switches, firewalls, and servers** to ensure network uptime and reliability.
- Automated network-wide policy enforcement via **Microsoft PowerShell** scripting, reducing manual IT workload and streamlining compliance across all endpoints.
- Managed user accounts in **Microsoft Active Directory** and provided **Azure** cloud support, enabling seamless onboarding and remote access for dealership staff and off-site customers.

## LEADERSHIP

### Reach Project Manager

January 2026 - Present

INIT FIU

Miami, FL

- Orchestrated continuous workshop programming for FIU students by coordinating scheduling, content formatting, and logistics to deliver behavioral and technical interview prep sessions as well as Data Structures & Algorithms curriculum.
- Led and managed a team of **5** leads to ensure seamless execution of workshops and learning materials, creating accountability and teamwork across all team members.
- Streamlined organizational processes by moderating team workflows and standardizing workshop materials, improving consistency and quality of educational content delivered to students.

## PROJECTS

### PrepBear | AI Mock Interview Website | Shellhacks

Sep. 2025 – Oct. 2025

- Integrated **Google Live API WebSocket**-based audio streaming in **TypeScript** to enable real-time, voice interactions between users and an AI mock interviewer.
- Designed and implemented the AI mock interviewer interface using **React** and **TypeScript**, delivering an intuitive user experience for conducting live interview sessions.
- Leveraged the **Gemini 1.5 API** to dynamically simulate tailored interviews based on user-provided job title, company, and resume inputs, deployed and used by real users.

### StudyDen | AI Education Mobile App | Remote

Feb. 2025 – Oct. 2025

- Developed **REST API** endpoints using **FastAPI** and **Python** to handle quiz generation workflows, integrating the **OpenAI API** to auto-generate personalized quizzes from learning materials provided by the user.
- Deployed and configured an **Ubuntu** server to host the project database, ensuring a stable and accessible backend for the full development team.
- Built frontend features in **React Native** for scanning and storing user books, creating a seamless in-app content management experience.
