EDUCATION

Florida International University

Aug. 2023 - Dec. 2026

Bachelor's in Computer Science

Miami, FL

- **Relevant coursework:** Data Structures, Algorithm Techniques, Systems Programming, Software Engineering

EXPERIENCE

FEAM Aero

Sep. 2025 - Present

Software Engineering Intern

Miami Lakes, FL

- Delivered **15-20 tickets** across **full-stack** features and bug fixes on a platform serving **1,500+ clients**, working in an **Agile** environment across a legacy (**C#, React, TypeScript**) and modern (**React, Tailwind, Node.js, Python**) codebase managed via **Azure DevOps**.
- Modernized and refactored legacy software features, improving application performance by **10-20%** and enhancing long-term maintainability across a large-scale management platform.
- Built and maintained **REST API** integrations using **Microsoft SQL Server** to fetch and manage operational data including mechanic work hours, fuel usage, and aircraft service records.

UKG

Sep. 2024 - Dec. 2024

Software Engineering Intern

Weston, FL

- Contributed to a **Microsoft Dynamics 365** webapp serving **80,000+ clients** by resolving backend tickets in a **Scrum** environment via **Azure DevOps**, using **C#, Microsoft SQL Server**, and internal **REST APIs** to fix bugs, improve automation, and enhance performance.
- Independently designed and developed a **full-stack** internal email automation tool using **X++**, enabling team members to assign automated actions to emails and receive real-time pass/fail notifications, reducing manual workload for the team.
- Improved overall engineering team efficiency **10%** through backend optimizations and delivering tooling that streamlined repetitive financial workflows within **Microsoft Dynamics 365**.

Mercedes-Benz

Aug. 2023 - Sep. 2024

Systems/Network Analyst

Coral Gables, FL

- Automated network-wide configuration and compliance enforcement via **Microsoft PowerShell** scripting, reducing manual IT workload by **30%** across **250+ endpoints**.
- Administered **Azure** cloud infrastructure and **Microsoft Active Directory** for **250+ users**, enabling remote access and identity management across dealership operations.

LEADERSHIP

Reach Project Manager

Jan. 2026 - Present

INIT FIU

Miami, FL

- Led a team of **5 leads** to plan and deliver weekly technical workshops for **10-15 FIU students**, covering Data Structures & Algorithms curriculum and behavioral and technical interview preparation.
- Designed and standardized **Python and Java** DSA workshop curriculum across **10+ sessions**, contributing to measurably increased student attendance and positive feedback scores.

PROJECTS

Job Posting Emailer | Automated Job Digest Service | Full-Stack | Solo

Mar. 2026 - Present

- Built a **Python + Playwright** pipeline that deduplicates and merges **Jobbright** internship listings from **two JSON sources**, the **Next.js** page payload and intercepted **network responses**, with per-user **dynamic time-window filtering** and **concurrent** email dispatch via **asyncio**.
- Replaced **keyword matching** with an **ML** semantic similarity engine via **sentence-transformers (PyTorch, Hugging Face)** that **batch-encodes** job postings and user filters into **embeddings**, scoring inclusion and exclusion via **cosine similarity**, deployed on **GitHub Actions CI/CD** with **model caching**, serving **20+ active users**.

PrepBear | AI Mock Interview Website | Team of 4 | ShellHacks 2025

Sep. 2025

- Integrated **Google Live API WebSocket**-based audio streaming in **TypeScript** and **Node.js** to enable real-time voice interactions between users and an AI mock interviewer.
- Leveraged the **Gemini 1.5 API** to dynamically simulate tailored interviews based on user-provided job title, company, and resume inputs, presented to **8 companies** and used by **25+ users** at **ShellHacks 2025**.

StudyDen | AI Education Mobile App | Team of 4

Feb. 2025 - Oct. 2025

- Developed **REST API** endpoints using **FastAPI, Node.js, and Python** to handle quiz generation workflows, integrating the **OpenAI API** to auto-generate personalized quizzes from learning materials provided by the user.
- Deployed a **FastAPI** backend and **SQLite** database on a **DigitalOcean Ubuntu** server, providing a stable hosted **API** for the full dev team.
- Built a **React Native** camera pipeline using **Pytesseract OCR** to extract and store textbook text in a **SQLite** database, fetched on-demand via **FastAPI**.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, C/C++, C#, Python3, SQL
- **Libraries/Frameworks:** Node.js, React, React Native, Tailwind, ASP.NET, FastAPI, Pandas, PyTorch, Hugging Face, Transformers, Playwright, Unity
- **Tools:** Git, GitHub Actions, Azure DevOps, Postman, DigitalOcean
